How do we expect this product to be distributed?

This product should be sold with the active assistance and guidance of an insurance intermediary to select the appropriate level of cover. The product will only be distributed through brokers to customers and not directly by Pen to customers.

This product is suitable to be distributed by Pen's coverholder partners and insurance brokers and can be sold via a variety of intermediated sales channels, such as face to face, telephone, email, or by postal application.

Consideration should be given to the vulnerability of customers by the Intermediary and provide any appropriate support they may need.

What are the distributor value considerations?

We expect all distributors in the chain to consider the following when selling Pen's products:

- The impact on product value of offering other products alongside this one, especially those with proportionally greater remuneration. For example, an ancillary product, elements of which may duplicate existing cover, or premium finance charged at an elevated rate of APR.
- Additional commission, fees or charges added as part of distribution processes must be proportionate to the service provided, in line with those charged elsewhere, and not affect the overall value offered by the product.
- Distributors must ensure there is no duplication of cover as a result of any add-on products sold where appropriate cover is already provided by the policy.
- Distributors must familiarise themselves with the product options and extensions available and consider these when selling Pen's products to customers.
- Distributors should consider the demands and needs of the customer and the Consumer Duty requirements when dealing with customers.

Important Information

This target market statement should be used by all (co-)manufacturers and distributors of this product. (Co-)manufacturers and distributors should not create their own variation of this document. Product Fair Value Outcome – Methodology

Pen has completed Fair Value Assessment work on products we co-manufacture. This is based on groupings of products which may be similar in features and are intended to be distributed to similar target markets.

This Product Fair Value Outcome Statement is not intended to replicate our Fair Value Assessments but sets out the approach taken and the outcome of the assessment.

Distributor Remuneration

Pen agrees commission rates with each distributor and as part of the fair value assessment process has requested details of any additional fees that may be added in the distribution chain. The fee details received have been analysed and if Pen considers these could impact the value of the product this would be raised directly with distributors.

All distributors should be able to:

- Confirm annually that the commissions and fees they charge are reasonable relative to the service(s) they provide and the total cost of the product to the customer; and
- Justify that commissions and fees they charge are fair and support the intended value of the product.
