How do we expect this product to be distributed?

This product should be sold with the active assistance and guidance of an insurance intermediary to select the appropriate level of cover. The product will only be distributed through brokers to customers with whom Pen has an agency and not directly by Pen to customers.

This product is suitable to be distributed via a variety of intermediated sales channels, such as face to face, telephone, email, or by postal application.

Consideration should be given to the vulnerability of customers by the Intermediary and provide any appropriate support they may need.

What are the distributor value considerations?

We expect all distributors in the chain to consider the following when selling Pen's products:

- The impact on product value of offering other products alongside this one, especially those with proportionally greater remuneration. For example, an ancillary product, elements of which may duplicate existing cover, or premium finance charged at an elevated rate of APR.
- Additional commission, fees or charges added as part of distribution processes must be proportionate to the service provided, in line with those charged elsewhere, and not affect the overall value offered by the product.
- Distributors must ensure there is no duplication of cover as a result of any add-on products sold where appropriate cover is already provided by the policy.
- Distributors must familiarise themselves with the product options and extensions available and consider these when selling Pen's products to customers.
- Distributors should consider the demands and needs of the customer and the Consumer Duty requirements when dealing with customers.
