### Fair Value Assessment

#### Product Fair Value Outcome – Methodology

Pen has completed a Fair Value Assessment on products we co-manufacture. This is based on groupings of products which may be similar in features and are intended to be distributed to similar target markets.

This Product Fair Value Outcome Statement is not intended to replicate our Fair Value Assessment but sets out the approach taken and the outcome of the assessment.

#### Distributor Remuneration

Pen agrees commission rates with each distributor and as part of the fair value assessment process has requested details of any additional fees that may be added in the distribution chain. The fee details received have been analysed and if Pen considers these could impact the value of the product this would be raised directly with distributors.

All distributors should be able to:

- Confirm annually that the commissions and fees they charge are reasonable relative to the service(s) they provide and the total cost of the product to the customer; and
- Justify that commissions and fees they charge are fair and support the intended value of the product.

#### How Pen Assesses Value

Pen’s product governance and oversight process requires a full review of all product groups at least annually to determine if the product offers fair value to the customer.

These reviews consider the following areas:

Target market	<ul style="list-style-type: none"> <li>• Target market reviewed to ensure the product meets the needs of the customer and will continue to do so for the life of the product</li> <li>• Identify the impact on vulnerable customers where applicable</li> </ul>

### What are the distributor value considerations?

We expect all distributors in the chain to consider the following when selling Pen's products:

- The impact on product value of offering other products alongside this one, especially those with proportionally greater remuneration. For example, an ancillary product, elements of which may duplicate existing cover, or premium finance charged at an elevated rate of Annual Percentage Rate (APR).
- Additional commission, fees or charges added as part of distribution processes must be proportionate to the service provided, in line with those charged elsewhere, and not affect the overall value offered by the product.
- Distributors must ensure there is no duplication of cover as a result of any add-on products sold, including premium finance cover, where appropriate cover is already provided by the policy.
- Distributors should consider the Consumer Duty requirements when dealing with policyholders.

### Fair Value Assessment Outcome

Pen has considered all relevant factors, including the total price paid by the customer, value MI, distribution and other considerations in this product design.

Pen is satisfied that the product continues to provide fair value to customers and is suitable to continue to be distributed to the identified target market.
